

# Nicolás David Faure

## Full Stack Web Developer

I am a Full Stack Developer experienced in building scalable, high-performance applications using React, Node.js, and Express, as well as Next.js and Nest.js for large-scale environments. I have hands-on experience with Docker for containerizing services, Firebase integrations, and have worked on AI-driven features using OpenAI and Gemini.

I enjoy implementing clean code practices, optimizing performance, and collaborating in agile teams to tackle complex challenges. I am looking to join an environment that values microservices architecture, code quality, and security.

### WORK EXPERIENCE

InsideOne

Role: Full Stack Developer

Period: 10/2023 – 08/2025

- Develop and maintain front-end applications with React and Redux, ensuring an excellent user experience.
- Build and manage RESTful APIs and services in Node.js, Express, Next.js, and Nest.js, following microservices architecture principles.
- Oversee database administration (PostgreSQL, Firestore), focusing on security, authentication, and performance.
- Utilize Docker for containerizing services, improving scalability and deployment consistency.
- Integrate OpenAI for text analysis and automated responses, incorporating AI-driven functionality.
- Employ Git for version control and collaborate under Scrum methodology.

### Highlighted Projects at Plataforma 5

- Box Delivery (3 months, 2023)
  - Team-based, mobile-first web application for home delivery logistics.
  - Key features:
    - User login and registration.
    - Different user roles for specific tasks.
    - Real-time package tracking.
    - Order management for delivery personnel.
    - Order cancellation and other typical delivery app features.
    - Technologies: Next.js, Nest.js, Docker, deployed on AWS EC2.
- One Feel Solution & Galicia Seguros (1 months, 2023)
  - Group project measuring real-time customer satisfaction.
  - Technologies: React, Redux, Sass, Firebase, OpenAI.
- E-Wine (2 weeks, 2023)
  - E-commerce platform for wine sales, including user login, shopping cart, order history, and admin dashboard.
  - Technologies: React, Redux, Express, PostgreSQL, Sass, JWT, Sequelize.
- TMDBFLIX (1 week, 2023)
  - Individual project that consumes the TMDB API to display information on TV shows and movies.
  - Features: user login, search functionality, favorites, descriptions, etc.
  - Technologies: React, Redux, Express, PostgreSQL, Sequelize, JWT, Sass, Framer Motion.

### TECHNICAL SKILLS

- |              |                |
|--------------|----------------|
| • Html5      | • JWT          |
| • Css3       | • Redux        |
| • JavaScript | • Sql          |
| • Sass       | • Postgres Sql |
| • Bootstrap  | • Firebase     |
| • ReactJs    | • Open AI      |
| • Docker     | • Gemini AI    |
| • MongoDB    | • Express      |
| • Typescript | • NodeJs       |
| • NextJS     | • JQuery       |
| • NestJS     | • Git - GitHub |
|              | • Tailwind Css |

### SOFT SKILLS

- Problem solving
- Teamwork
- Creativity and Innovation
- Analytical Thinking
- Organization
- Design thinking
- Scrum methodology
- Leadership Skills
